

The Forgotten Islands

Societies that people forgot about

INTRODUCTION

A man by the name of Ioane Teitona came to New Zealand to seek asylum after leaving Kiribati, because of the overcrowded places in Kiribati and the rise in the sea levels that happened in the 90s. He protested, in 2013, “There is no future for us when we go back to Kiribati”.

The Kiribati

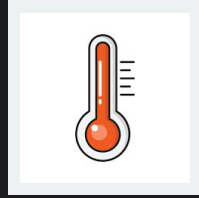

- **Location**
- **Temperature**
- **Population**

Location

Oceania, its capital is **Tarawa**.

Climate

- Marine
- Very hot
- Humid

Population

116,545 Person
56,364 Male
60,181 Female

- In 2012, Kiribati purchased a 22KM of land from Fiji for potential resettlement.
- The Fijian prime minister in 2014, announced that Kiribati residents would be welcome to relocate to Fiji.

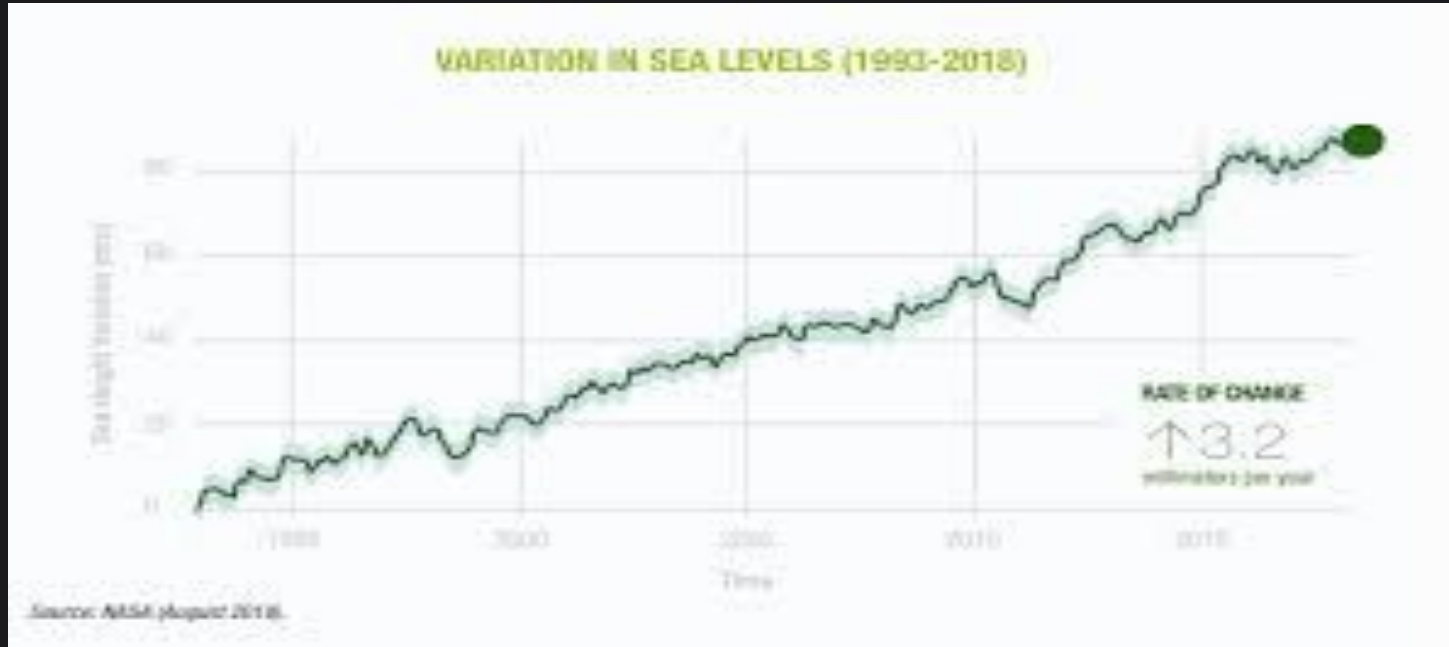

Reasons

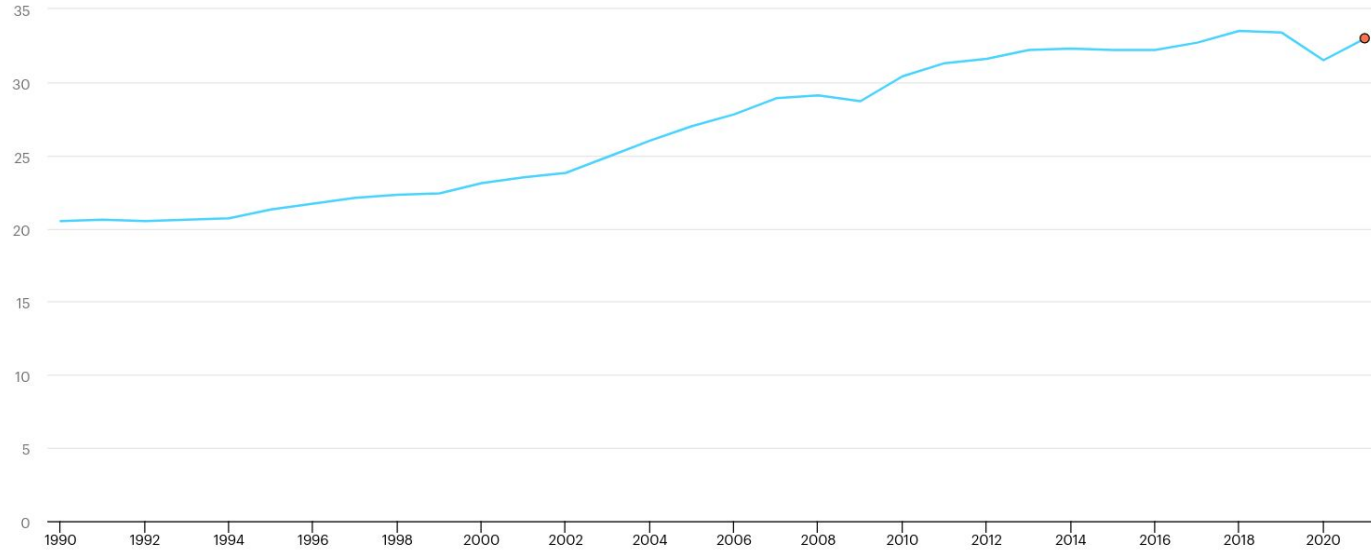

- Rising Sea Levels (**Main Reason**)
- The Negligible Size of Some Islands

Graph of Sea Levels (1993-2018)

Graph of Emissions (1990-2021)

Gt CO₂

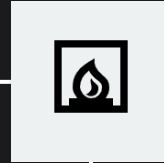

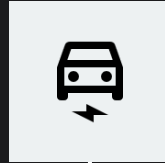

Recommendations to Prevent Rising Sea Levels

Car Exhausts

Using electric or hybrid cars instead of fuel powered cars

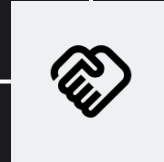

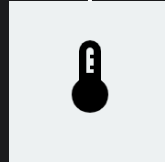

Factory Chimney

It can be done by factory chimney filters

Temperature

Temperature average should not increase more than 1.5C per year

UN and COP Agreements

Activating International and UN agreements to preserve the environment

Thank You!
